LOW IMPACT DEVELOPMENT FOR EASTERN WASHINGTON

Washington State University Campus • Pullman, WA
Smith Center for Undergraduate Education (CUE)
Room 209
June 3, 2011, 10:30am-3:30pm
(Lunch break from 12:30-1:30pm)

The workshop will provide an overview of the following key topics:

- What is low impact development (LID)?
- Regulatory drivers for LID (current requirements and a discussion of what is coming)
- LID site planning principles
- LID best management practices (BMPs)
  - Description of facilities
  - Capabilities (water quality treatment and flow control performance)
  - Siting and design criteria (overview)
  - Construction and operation and maintenance (O&M) costs
- Implementing LID
  - What types of LID can you find in Eastern Washington?
  - What types of LID work well in Eastern Washington and similar climates?
  - What are the barriers to LID implementation?
  - What types of tools could be developed to reduce barriers to LID?
  - O&M checklists
- Useful references
