Participation Outline & Responsibilities:
WSU Puyallup Faculty, Staff and Partners will facilitate the PhotoVoice Project Sessions 1-4 along with photo selection, preparation, and hosting of the Gallery show.

The Participants are responsible for taking and submitting their photo images and creating the accompanying photo captions to convey their story. Participants are required to attend all four sessions outlined below:

1. **Session One** (3 hours)
   - Goal for the day: participants will form a clear vision of the project, its purpose, the photovoice method, and start to formulate their story content and think about the photos they will take
     - a. Part one (1 hour 30 minutes)
       - i. introductions of the project members
       - ii. Introduction to photovoice
       - iii. Discussion: what makes a good photovoice story/image?
     - b. Break
     - c. Part two (1 hour 30 minutes)
       - i. Project purpose and paperwork (take survey questionnaire)
       - ii. Photography 101 workshop
       - iii. Closure: thinking about the photos you will take and the story you will tell

   **Participant Homework:** *(Completed in the field after Session One and before Session Two)*
   Participant will be asked to take as many as 20 photos/images for the next meeting/session. These will be focused on telling the story of their interaction with Clark’s Creek watershed (specifically its health or lack of it). These can be “positive” or “negative” stories/images of the watershed.

2. **Session two** (3 hours)
   a. Goal: participants will begin the process of sharing their photos and telling their stories/perspectives
   b. Consensus group participant will share their photos in small breakout sessions using the SHOWeD pneumonic
   c. Break and transition to larger discussion group
   d. Large groups will discuss the themes from each of the groups. “what were the themes that you came up with in your group? Positive themes? Negative ones? Did any themes focus on the “health” of the watershed? “what information/science about the health of the watershed do you feel you need?—this will be the basis of the watershed science talk to be developed and tailored for this group)
   e. Closure: what photos will you take for the next session? What stories do you want to tell with them?
3. **Session three**
   a. Goal: participant will receive hands on, tailored instruction on watershed science developed from their photos and questions
   b. Closure: again, the participant will be asked about what photos they might take to tell their stories further

**Participants Homework:** *(Completed in the field after Session Three and before Session Four)*
Participant will be asked to take as many as 20 photos/images for the next meeting/session. These will be focused on telling the story of their interaction with Clark’s Creek watershed (specifically its health or lack of it). These can be “positive” or “negative” stories/images.

4. **Session four** *(3 hours)*
   a. Goal: to once again share the participants’ images/perspectives on the health of the Clark’s Creek watershed but also to discuss “next steps” regarding their “voice” and their behaviors
   b. Part one: discuss their images and themes
   c. Snack and transition to larger discussion group
   d. Part two:
      i. What were the larger themes that you came up with, positive or negative?
      ii. What can be done about the negative issues and to reinforce the positive things you talked about regarding the health of Clark’s Creek?
      iii. Discuss photo voice exhibit: participants will be invited to submit images and captions to be exhibited in a gallery TBD. Selected images will be exhibited and participants invited to come and “Tell the stories” of their images to invited guests
   e. Workshop closure: *Post Survey on Watershed Science knowledge, attitudes, and practices[^1]*, *Project Evaluation.*

5. **Gallery Display**
WSU will prepare a Clarks Creek PhotoVoice Gallery Display Event 2016 to display the student and community photo stories.

[^1]: If possible, it would be beneficial to follow up with a repeat of the survey one month later, by email.
