BASIC PRINCIPLES OF STORMWATER 101/101X: STORMWATER MANAGEMENT FUNDAMENTALS

For: NPDES Permit Holders, Engineers, and Consultants

Includes: SWPPP binder, class materials, professional instruction, lunch, and refreshments

- Overview and update of WA stormwater regulations & permit requirements
- Creating Stormwater Pollution Prevention Plan (SWPPP) & Spill Prevention & Emergency Cleanup Plan (SPECP)
- Selecting & implementing Best Management Practices (BMPs)
- Monitoring, reporting & appropriate sampling techniques
- 101X: two-day course covering the same material plus hands-on field exercises

ADVANCED STORMWATER MANAGEMENT 201X: A CASE STUDIES APPROACH

For: NPDES Permit Holders, Engineers, and Consultants. Recommended prerequisites: 100 (Permit) & 101 (Fundamentals)

Includes: Class materials, professional instruction, lunch, and refreshments

- Two-day course with site tours and treatment technology presentations by the pros
- Examination of state and federal policy drivers and trends; Ecology & citizen group enforcement; & other stakeholders affecting decision-making
- Case studies are utilized to show how sites have found success or dealt with struggles in managing their Industrial Stormwater Management Permit programs.
