Plan to join your fellow Washington State stormwater professionals for **MuniCon 2021 — April 28 & 29 in Kennewick.**

This unique conference focuses specifically on addressing high-priority issues and challenges faced by municipal NPDES permittees statewide, in order to promote broad communication, coordination, and sharing of valuable municipal tools and stormwater management approaches from permittees and other professionals across the state.

APRIL 28 & 29, 2021
Three Rivers Convention Center
Kennewick, Washington

The conference will provide:

- ◆ A unique experience focused specifically on addressing high-priority issues and challenges faced by municipal NPDES permittees statewide.
- ◆ Networking with municipal permittees from throughout Washington.
- ◆ Diverse planning and operations technical topics.
- ◆ Training sessions.

Due to the continued popularity of our half-day workshops, we are again looking for groups who may be interested in self-organizing a session to provide in-depth perspective and/or training on a topic of significance to permit holders across the state. Please contact Laurie Larson (253-445-4593, laurie.larson-pugh@wsu.edu) for information on how to develop your proposal.
