

Washington Stormwater Center

April 13, 2012

We hope that you are finding the services and website of the Washington Stormwater Center to be a valuable resource.

Please read on for news updates from WSC!

Remember to visit our [blog](#) on our website. If you are a stormwater organization, such as a coordinator group, contact us if you would like to help facilitate information sharing among your group.

Washington Stormwater Center Hires Business Program Specialist

WSC is pleased to announce the addition of Lisa Rozmyn to its staff. Lisa comes to us from the Port of Tacoma where she worked with tenants, Port staff and local jurisdictions to manage stormwater on the Tacoma Tideflats. With more than 20 years working on various environmental programs, including stormwater, hazardous waste management and environmental permitting she will be providing Washington businesses with much needed regulatory and technical assistance.

Watch our website for more opportunities to learn more about stormwater management including assistance with the recently modified NPDES Industrial Stormwater General Permit, which goes into effect July 1, 2012.

2012 University of Washington Water Symposium

The 2012 UW Water Symposium is coming up next Wednesday, April 18! This event, co-sponsored by the UW Tacoma Center for Urban Waters and Puget Sound Institute, continues the long UW tradition of bringing together regional water scientists and engineers for a day of learning, discussions, and fun.

The event will be hosted at the Center for Urban Horticulture at UW Seattle, and is free and open to the public.

For complete schedule details and to register, visit the event website: <http://www.tacoma.uw.edu/water>

New Legislation on LID

New legislation may delay effective date for implementation of LID. Second Engrossed Substitute Senate Bill 6406 allows for the extension of time a Permitted Municipality has to implement mandatory LID requirements in their jurisdiction.

Bill language can be found on the [Legislature's website](#) (section 313 of the bill).

The bill is now before Governor Gregoire. Watch the Washington Stormwater Center's or Ecology's website for more and updated information.

As always, please feel free to submit [comments](#) on our web pages, events, or other stormwater issues and concerns.

Washington Stormwater Center is here to help *you*.

Sincerely,

Washington Stormwater Center
