Good morning Municipal Stormwater Permittees,

information to share, including a request for information from a permittee, access to the BIG Source Control Program Report and documents, new workshop/trainings, and municipal stormwater job opportunities. There is a lot of useful information please take a look and share with others.

PERMITTEE REQUEST FOR INFORMATION:

The **City of Gig Harbor** is in search of information on permeable pavement maintenance equipment. If you have answers to the following 2 questions please send me the answers and I will compile the response and pass them on:

1. Can you provide contact information on permeable pavement maintenance equipment?
2. What type of units jurisdictions are using to clean permeable pavement?

The **City of Woodinville** has the following inquiry: Does anyone that doesn't have asset management software have an effective way for communicating with maintenance staff and tracking maintenance done on facilities? I am looking into using just an Excel tracking sheet or Survey123 to ensure maintenance is done within the maintenance schedule. I have also thought about using a SharePoint for ease of access in the field/on the go. please send me the answers and I will compile the response and pass them on:

RESOURCES:

The City of Poulsbo created by a SMAP Guidance document package (based New Castel and Battle Ground compliance sheets) to distribute to their SMAP team members. This package contains an excel Permit Implementation Schedule Tracking sheet that includes "prep work" to the schedule ahead of each SMAP due date. The prep dates are an arbitrary estimate included as a visual reminder to help the team think about Planning ahead! The package information can be accessed on the WSC website at:

<https://www.wastormwatercenter.org/western-washington-stormwater-resources> scroll down the page they below the compliance table information.

WORKSHOP/TRAINING OPPORTUNITIES: *These dates are subject to change depending upon COVID-19 containment measures* check with the training/workshop contact for updates.

JOB OPPORTUNITIES: please share with anyone who may be interested in listed below:

City of Tacoma is hiring a Senior Environmental Technician in their Stormwater Sampling group. . Find the position description and details on how to apply at: <https://www.governmentjobs.com/careers/tacoma/jobs/2725568/environmental-technician-senior-environmental-services-department?keywords=&pagetype=jobOpportunitiesJobs>

Application deadline is March 9th.

The Washington State Dept. of Ecology's Water Quality Program is recruiting for a unit supervisor in our southwest regional office: [Southwest Region Watershed Resources Unit Supervisor \(WMS Band 1\)](#). We're looking for the right candidate who can manage, lead, and supervise a staff of 11 professionals conducting vital water quality work in our state. It's a great team of folks, and we need to find the best person for this position – it may be you, or it may be someone you know. The deadline to apply for this opportunity is March 26.

If you have specific questions about this position, please email Andrew Kolosseus at Andrew.Kolosseus@ecy.wa.gov. Please do not contact Andrew to inquire about the status of your application.

Ecology's mission is to protect, preserve and enhance Washington's land, air and water for current and future generations. A description of this job posting and information on how to apply for it is available here: <https://www.governmentjobs.com/careers/washington/jobs/2734275/southwest-region-watershed-resources-unit-supervisor-wms-band-1>
