

Farmers' Market season *is back!*

The return of events means fun food, handmade treasures, fresh cut flowers, and unfortunately, lots of clean up. Make sure your booth doesn't become a source of pollution. The Washington Stormwater Center is bringing you a FREE webinar on how to prevent pollution from your booth! Learn tips and tricks for material handling, post-event clean-up and many other challenges your event booth faces.

FREE WEBINARS FOR EVENT VENDORS

Farmers' Market Webinar

April 13, 2022 | 3:00 - 4:00 pm

April 19, 2022 | 3:00 - 4:00 pm

Bryana Solis works for the City of Puyallup, Washington as a Pollution Prevention Specialist in the stormwater engineering department and has been with the city for eight years. Providing guidance to business owners on how they can help protect our local waterways. She is in her final year attending the University of Phoenix, bachelor's of science in environmental science. Before entering the public sector, she worked in the automotive industry for 11 years. Bryana loves the outdoors and in between work and school assignments takes every chance she can to enjoy our beautiful state.

Maddie Burke works in water resource protection at the City of Vancouver, Washington. Maddie graduated from the University of Portland with a degree in civil engineering. Maddie has spent the last four years living in Vancouver. Maddie responds to water quality threats and helps enforce City Stormwater requirements. She works with businesses, construction sites, and the public to provide guidance about water protection and best practices. Before working in water protection, Maddie worked in food carts for seven years and catering for four years. In her free time, Maddie loves trying new restaurants and bars.
