

## Education & Outreach Blog

May 2023

The **Don't Drip and Drive website is back up and running!** It has found a new home on the Washington Stormwater Center's new Education and Outreach page. You can find it on the sliding banner at the top of the page at [Education & Outreach – Washington Stormwater Center](#).

If you have never heard of Don't Drip and Drive, it is an educational, behavior change campaign developed to encourage people to fix the fluid leaks in their cars. The goal is to prevent the pollutants from those fluids from being carried away into our storm drains in the next rainstorm.

There is good information to assist in the Diagnosis of Leaks, in Preparing You to See a Mechanic and in providing Preventative Tips. The English version is up and the Spanish version will be up soon. There is great information to include a FAQ, toolkit, videos and a contact. Here is the direct [Don't Drip & Drive link](#).

There is the potential to develop: agreements with your local auto shops to do the inspections, coupons to encourage participation and incentives to help with any repairs. Those decisions can be made in your own jurisdiction. If you do so, please let us know and we will add your information to the site.

We encourage you to look at the many resources we are including on our new E & O page. We are trying to assist you in meeting your E&O permit needs. Please send comments to [Anne.melrose@wsu.edu](mailto:Anne.melrose@wsu.edu). Enjoy the coming warm weather!
